

ALCOHOL AND SEXUAL ASSAULT EDUCATION

AlcoholEDU and Sexual Assault Education

CSU is committed to providing a safe campus for all students and promoting a culture of respect, dignity, and safety. As a result, CSU requires students to complete the AlcoholEDU and Sexual Assault Prevention online modules.

AlcoholEDU

This online education module will help you make informed decision about alcohol and other drugs and prepare you to respond in potentially risky situations, whether you choose to use or not.

This module is required for all incoming undergraduate students under the age of 23 (by 35 days before the semester starts), including new, transfer, and international students. Please note that CSU does not accept course completions from previous institutions. Exceptions: graduate students, distance learners not physically present on CSU campus, non-degree seeking students who are taking courses without pursuing a formal credential through CSU.

The online module will be available 35 days prior to the beginning of the semester. You can access the program directly through your RAMweb (<https://ramweb.colostate.edu/registrar/Public/Login.aspx>) account under the "Health Network" menu. You will also receive an email to your CSU email address alerting you that the module is open. The email will include detailed instructions on how to complete the module.

More information, including frequently asked questions, can be found at <https://health.colostate.edu/alcoholedu-faqs/>

Sexual Assault Prevention

All students admitted to CSU, regardless of age or status, are required to complete the Sexual Assault Prevention online module. This module focuses on issues associated with stalking, interpersonal violence, and sexual assault. It helps students learn about consent, how to help a friend and how to safely intervene in a potentially dangerous situation.

Sexual Assault Prevention will be available on RAMweb (<https://ramweb.colostate.edu/registrar/Public/Login.aspx>) thirty-five (35) days prior to the beginning of the semester.

More information about sexual assault prevention can be found at safecenter.colostate.edu (<https://safecenter.colostate.edu/>)
